

Postenco Pty Ltd was established in 2008 to provide specialist post-tensioning design and construct service to the Melbourne construction industry. Postenco's personnel are experienced managers, engineers, and technical staff with in excess of 25 years experience in the industry. Postenco's main objective is a professional approach to all its services, with emphasis placed on sustainability.

Post-tensioning system specialist, Postenco, focus is in providing innovative and cost efficient solutions for their clients and this approach is clearly evident in their works on past and current projects.

VISION

"Creating better design and construction solutions"

MISSION

"To provide Specialised Engineering Services involving Post Tensioned Concrete for the Building and Construction Industry"

OBJECTIVES

Increase the awareness and acceptance of Pre-Stressing technology as a realistic and cost effective preferred construction method

Establish a strong market position in the Building and Construction Industry sector

Ensure that services offered are consistent with internationally recognised standards

Implement administrative and operational facilities that will provide efficient and effective customer service

Ensure that all Employees and Sub-Contractors are highly skilled and are trained to perform their

tasks at the highest standard

SUSTAINABLE COMPETITIVE ADVANTAGE

"We will provide cost effective, efficient construction methods that exceed

customer expectations"
